

Sales & Profit Analysis Dashboard Using Microsoft Excel

1.1 Project Overview

Developed a Sales & Profit Analysis Dashboard using Microsoft Excel to analyze sales performance, costs, profitability, products, regions, categories, and customer types. The project involved data cleaning, analysis using PivotTables, data visualization, and dashboard development.

2.1 Objective

To Transform raw sales data into meaningful business insights and create an easy-to-understand dashboard that helps identify profitable products, high-performing regions, major sales categories, and customer trends.

3.1 Tools Used

Microsoft Excel

- Data Cleaning
- Excel Formulas
- PivotTables
- PivotCharts
- Data Visualization
- Dashboard Creation

4.1 Dataset

The dataset contains 20 sales orders covering January and February 2026.

The dataset includes:

Order ID | Order Date | Product | Category | Region | Quantity | Sales | Cost | Customer Type | Profit

5.1 Data Cleaning

Checked the dataset for duplicate records, missing values, data-type issues, and inconsistent category, region, and customer-type values. Created a calculated Profit column using:

$$\text{Profit} = \text{Sales} - \text{Cost}$$

6.1 Key Results

KPI	Result
Total Sales	₹14,87,000
Total Cost	₹11,67,000
Total Profit	₹3,20,000
Total Quantity	105
Profit Margin	21.52%

7.1 Key Business Insights

- Mobile generated the highest profit: ₹1,15,000.
- Chennai generated the highest sales: ₹7,89,000.
- Electronics generated the highest category sales: ₹10,70,000.
- Regular customers generated higher sales: ₹8,52,000.
- Headphones had the highest quantity sold: 25 units.
